Key vocabulary

Tier 1: big, small

Tier 2: camera, phone, photo, brightness

Tier 3: edit, adjust, landscape, portrait

Prior learning

In Year 1 we talked about different items that are electrical. We already know that devices such as iPads and cameras can take photos.

My Component Knowledge

Lesson 1: I can recognise some different electrical devices that take photographs.

Lesson 2: I can understand the difference between landscape and portrait photographs.

Lesson 3: I can recognise what makes an effective photograph.

Lesson 4: I can learn how to edit lighting and focus.

Lesson 5: I can apply effects to photographs.

Lesson 6: I can recognise whether a photograph is real or fake.
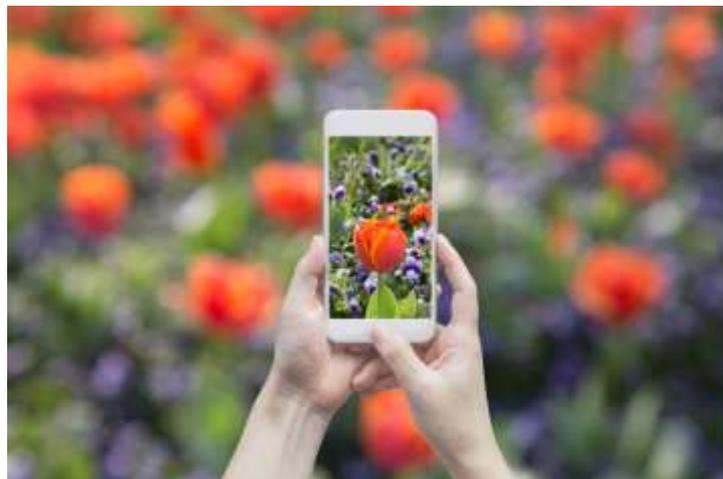

My Composite Knowledge:

I can learn about how photos were taken in the past and whether that is similar or different to nowadays.

My Powerful Knowledge:

I can explore examples of photographs to decide whether they are real or fake. I can consider how I could edit photographs using different software. I can evaluate my photos and consider what I could do to improve them through editing or if I was to re-take the photograph next time.

Is your photo taken in landscape or portrait mode?

How could you edit your photo to further improve it?
